Oil and Gas Projects

Oil and Gas, CSS and Hydrogen projects often require complicated and challenging well designs and interventions in order to safely operate in the subsurface.

Well Engineering Partners designs, realizes, manages, and plug & abandons oil, gas, salt solution and renewable energy wells and assets for clients across the world, and delivers a range of solutions to support safe operations. We have been supporting the industry for two-and-a-half decades. WEP's board members and drilling & project managers have 25+ years experience on average in the oil&gas industry. The majority started their careers at the major operators.

Our company offers global consulting to assist our clients in planning, development, design, procurement, supervision, examination, intervention, decommissioning, plug&abandonment and innovative tools development for wells.

Key facts WEP in Solution mining:

- Over 25 years experience of board and managers in Oil and Gas
- More than 20 Oil and Gas operators served
- Over 20 oil and gas projects world wide
- Development of new technology
- Involvement in CCS projects

Key facts WEP:

- Founded: 1996
- Employees: 30 engineers, ranging from BSc to PhD
- In-house expertise: well- & drilling engineers, projectmanagers, wellsite engineers, drilling supervisors and managers, and geotechnical engineers
- Extensive network of associated consultants
- Operating branches: geothermal energy, solution mining, oil & gas, and new technologies
- Operating area: worldwide

Our Services:

Integrated Project Management (IPM)

HSE and risk Management

Tendering, Well Cost Control and Logistics

Well examination

Well supervision

New technology

Subsurface Services

Plug and Abandonment services

Wellsite Supervision

Execution Support

We can integrate our well engineering, operations, commissioning and engineering capabilities to deliver significant synergies, innovations and value. We are focused on HSE and continuous improvement, maximising value for our clients and ensuring quality and integrity. We are able to act as lead contractor, coordinating service providers and delivering large scale projects. We have core technical capability of stable, long term and operationally active technical professionals that give us the ability to quickly scale up or down for client requirements. We have a strong supply chain capability in terms of; contracts, procurement and logistics, with associated partners and network.

Our flexible well engineering and project management solutions are delivered in close collaboration with our clients from exploration to decommissioning. We help national oil companies, international operators, new entrants and smaller independent operators overcome experience gaps, resource constraints and time pressure.

Are you looking for experts in oil and gas or general well engineering and operations management? WEP is your partner!

Our team is looking forward to discussing the opportunities of your project with you and to working together on a sustainable future.

You can contact us by email info@we-p.nl or phone +31 (0) 528 227 710.
